

Vangelis Mitsianis

Senior Full-Stack Engineer

Náoussa, Greece • Remote • +30 6978 110 459 • ev.mitsianis@gmail.com • [LinkedIn](#) • [GitHub](#)

SUMMARY

Senior full-stack engineer with 7+ years building production web applications, currently leading a 7-engineer web team. Specializes in React, Next.js and TypeScript on the frontend, backed by Node.js and Go services and SQL/NoSQL data layers on AWS. Proven record of shipping performance-critical features, owning architecture end to end, and coordinating across QA, DevOps, product and design.

SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, Angular, Redux, HTML, CSS, Responsive Design, Flutter

Backend: Node.js, Go (GoLang), Python, REST, gRPC, WebSockets, Microservices, OOP

Databases: PostgreSQL (PostGIS), MongoDB, Amazon DynamoDB, SQL, NoSQL

Cloud & DevOps: AWS (Lambda, API Gateway), Docker, Kubernetes, CI/CD, Git

AI-Assisted Dev: Claude, Claude Code, GitHub Copilot, OpenAI API, RAG, building AI-powered features

Testing & Tools: Jest, Cypress, Figma, Agile / Scrum

EXPERIENCE

Lead Web Engineer — VODA.ai — Asset Management Powered by AI Jun 2022 – Present

- Lead a team of 7 web engineers, coordinating closely with QA and DevOps to deliver the company's main customer-facing app, admin panel and a secondary frontend in React.
- Architected the full stack end to end — React frontends, Node.js services, and MongoDB, PostgreSQL and DynamoDB data layers connected via API Gateway and Node, Go and Python Lambda functions.
- Eliminated major performance bottlenecks by parallelizing Go Lambda functions and adding spatial geometries via PostGIS, dramatically cutting processing time on large-dataset projects.
- Built an AI copilot using the OpenAI API — a key product differentiator and sales highlight that answers water-industry questions via RAG and performs in-app actions from natural-language prompts.

Full-Stack Developer — Softhouse.gr — Software House Dec 2020 – May 2022

- Owned responsive full-stack web and mobile projects start to finish using Angular, React Native, Node, Go, MongoDB and PostgreSQL, including key architecture decisions.
- Partnered with marketing and sales to keep delivery aligned with client needs.

Full-Stack Engineer — Tradeline — Commodity Trading Automation Platform Sep 2019 – Nov 2020

- Built the Angular frontend and TypeScript/Node backend (MongoDB, gRPC), linked via HTTP and WebSockets.
- Collaborated with product and design to create a Storybook and a reusable npm UI component library.

Full-Stack Web Developer — Freelance Jun 2018 – Aug 2019

- Delivered full-stack web apps from the ground up with React, Node, Express and MongoDB, from e-commerce platforms to game-assisting tools.

EDUCATION

B.Sc. Electrical & Computer Engineering — University of Thessaly, Volos, Greece 2018

Certificate of Proficiency in English — University of Michigan • Languages: English, Greek
